Made in the USA

Best Value

With our extensive experience, you can rest assured our systems will provide top quality performance, greater efficiency and offer the best value, considering price and performance!

Drinking pure water supports digestion and overall health.

General Description

What is the RO-4 System?

A 4-stage reverse osmosis water filter system with quick-change cartridges – no tools or technician required.

Removes: arsenic, fluoride, nitrates, chlorine, heavy metals, total dissolved solids (TDS), pathogens, viruses, bad tastes and odors.

How It Works

4 Stages of Filtration

1. Sediment Filter – Captures dirt, rust, and particles.
2. Carbon Filter – Reduces chlorine, odors, and tastes.
3. RO Membrane – Filters out heavy metals, viruses, and dissolved solids.
4. Post Carbon Filter – Enhances final taste.
